

ABSTRACT

1  
2 An adjusting device for installing a manhole ring onto a manhole is provided.  
3 The manhole has an annular inner shoulder. The adjusting device comprises a center  
4 plate and at least one supporting arm. Each supporting arm has a first end and a second  
5 end with the first end of the supporting arm being securable to the center plate. A  
6 securement assembly associated with the center plate releasably holds the manhole ring.
